

MUHAMMAD NABIL BIN MOHAMMAD SHUKRI

Bachelor of Computer Science (Network Security) with Honours

Alor Setar, Kedah | +601151429633 | [E-mail](#) | [LinkedIn](#) | [E-profile](#)

SUMMARY

Bachelor of Computer Science (Computer Network Security) from Universiti Sultan Zainal Abidin (UniSZA) with a strong interest in Computer Security, Penetration Testing and Digital Forensics. Possesses a solid foundation in networking fundamentals backed by Cisco training. Experienced in engineering application-level AES-256-CBC encryption for secure data protection and configuring secure network access via multiple hands-on lab projects. Highly focused on penetration-testing and defensive security roles, applying hands-on techniques to real-world scenarios. Proactively acquire new security knowledge through self-directed study and CTF participation. Willing to give full dedication, commitment and determination to work well.

EDUCATION BACKGROUND

- Bachelor of Computer Science (Computer Network Security) with Honours at Universiti Sultan Zainal Abidin (UniSZA), (2023-Present)
 - Current semester: 6
 - Current CGPA: 3.34
-

PROJECT & HANDS ON LAB EXPERIENCE

1. Final Year Project: Secure Smart Patient Kiosk Registration Using MyKad And Biometric Authentication With AES-256 CBC Encryption
 - Developing a secure kiosk for patient registration using Raspberry Pi 4, implementing AES-256 CBC encryption to protect Personal Identifiable Information (PII).
 2. Iot Project: Smart Rehabilitation Squat Assistant
 - Designed a Smart Rehabilitation Squat Assistant utilizing ESP8266 and ultrasonic sensors with real-time Blynk cloud integration.
 3. Human Interface Device (HID) Attack Simulation (Academic Lab)
 - Simulated a HID attack using the Brutal framework in Kali Linux via a Windows Batch (.bat) file to evaluate antivirus evasion and establish a reverse shell.
 4. Web Traffic Analysis (Academic Lab)
 - Utilized **Nmap** for network scanning and **Burp Suite** to intercept HTTP requests, analyzing session cookies and web application access controls within a sandbox environment.
-

LEADERSHIP AND INVOLVEMENT

1. Serve as Vice Secretary in Robotic Club (RoboPro UniSZA), (2025 - Present)
 - Create and refine high-quality paperwork for superiors and create official invitation letters to schools
 - Spearheaded end-to-end event execution and project management as Project Director for secondary school outreach programs.
 - Managed logistics, budget allocations, and technical asset preparation while leading junior committee members to deliver high-impact training modules.
 - Designed and facilitated technical hands-on workshops on Tinkercad (3D Modeling & Circuit Design) for school students.
2. Involved in Capture The Flag competition, CTF UniSZA - UMT 2024 (3rd Place)
 - Network analysis and computer forensic techniques are used to complete security challenges, leveraging **Wireshark** and **Autopsy** for packet and file analysis.
3. Involved in Capture The Flag competition, CTF UniSZA - UMK 2025
 - Applied steganography and cryptography techniques to solve complex security problems, leveraging **OpenStega**, **HexEditor** and **Exiftool** for deep file inspection and metadata analysis.

SKILL

- Hard Skill
 - Network Reconnaissance (Nmap), Web Traffic Analysis (Burp Suite), Symmetric Encryption (AES-256), Microcontroller Programming (Raspberry Pi, ESP8266), Basic Linux Administration & Windows Security.
- Soft Skill
 - Critical Thinking, Analytical Problem-Solving, Team Collaboration & Project Management, Adaptability, Strong Technical Documentation.
- Security Concept (Theoretical)
 - SIEM Concepts, Incident Response Workflows, Vulnerability Management.

CERTIFICATION & AWARDS

- CCNA: Switching, Routing, and Wireless Essentials (2025)
- Dean's List Awards: UniSZA (Semester 3 and semester 4)

ADDITIONAL INFORMATION

- LANGUAGE
 - Malay: Native
 - English: Good
-
